

TRANSIT ISOLATION FACILITY FOR STAFF RETURNING TO IRAQ

**A COVID 19 Isolation Facility Approved
By Iraq Health Authorities**

APPROVED COVID-19 HEALTH MONITORING SERVICE AT IRAQ ENERGY CITY A PREMIER LIFE SUPPORT BASE IN BASRA

Petronor will provide facilities and services, approved by the Iraqi Health Authorities to allow personnel travelling to Iraq to complete their 14 days self-isolation / quarantine procedures under medical supervision at its site, Iraq Energy City ("IEC"). The Service is complete with the necessary screening, supervision, and support in a safe environment during the isolation period. Premium life support allows for a comfortable stay and enhanced IT provision will equip guests to work from their rooms.

Every effort is made to make the guests comfortable. Dedicated internet is provided to allow connection to home and family as well as work continuity during the isolation period.

MEDICAL SERVICES AVAILABLE IN THE TRANSIT FACILITY

Petronor, will with the support of International SOS, provide individual visitors transiting, or returning to, Iraq Energy City ("Transit Guest") with health supervision to successfully implement a medically led isolation / quarantine surveillance overseen by an Occupational Health Qualified Doctor ("Transit Services").

TRANSIT ISOLATION PACKAGE INCLUDES:

1. MEDICAL SERVICES AVAILABLE TO TRANSIT GUESTS

Provision of a self-isolation / quarantine kit for each self-isolated / quarantined Transit Guest to enable monitoring and follow-up of the condition of the individual Transit Guest.

Daily medical follow-up for each Transit Guest during the self-isolation / quarantine period with the dedicated Transit Isolation Facility health care personnel on site and (remotely) by Zoom / WhatsApp / Skype as a preference*

Coordination between life support camp management, client, isolated guest / resident, if the isolated guest / resident becomes symptomatic and / or confirmed case**

Defined List of Routine Medication and Disposables***

24-hour Assistance Centre Support and Coordination in the event of a medical evacuation****

**Individual daily medical follow-up could include temperature check, health check questionnaire, patients general well being checked, as well as specific symptoms checked. An increasing number of virtual check-ups each day as determined by the supervising health care practitioner in consultation with the managing Doctor. Isolated guests / residents may 'call-back' to the 24/7 monitoring health care practitioner on a 24h basis.*

***In conjunction with Petronor Group, International SOS have passed an audit by the Iraqi Ministry of Health and have been accredited as being able to isolate / quarantine at Iraq Energy City (IEC). This enables the provision of the COVID-19 Surveillance, Isolation & Quarantine Program at IEC, as an authorized isolation and quarantine site. If during isolation the guest develops mild symptoms those symptoms can be treated by Intl. SOS onsite Health Care Practitioner (HCP), meanwhile the local authorities will come to IEC to collect the sample required to perform the confirmatory testing. A key benefits of being an accredited facility, as it avoids the need to travel downtown to the nominated government testing facilities. If confirmed positive then Intl. SOS will coordinate with the guest, their employer, IEC management, and the health authorities to determine the best course of action, which could be to evacuate the individual or move them to an authorised medical facility if advanced care is required prior to evacuation.*

Note: The Transit Isolation Facility is not a treatment facility for COVID-19, and it is not authorized or equipped to treat COVID-19 patients.

****Medications for treatment of COVID-19 itself and approved Rapid Test Kits (RTK) are excluded.*

*****Additional Intl. SOS services are such as dedicated Air Ambulance and repatriation are available for additional fees.*
