

## CEO, AL-ZAMAN GROUP

Our Corporate Culture has been tailored through combining a set of methodologies to best serve our business to thrive; the main pillars of our corporate culture are our vision and mission statements, our core values in addition to navigating and adapting different geographical cultures. Mission and Vision The perfect blend of top-notch workforce and management team, first class waterfront engineering infrastructure, strategic locations and exceptional customer focus is our formula of choice to achieve our mission «building the Ships of tomorrow». Our vision is to persist building our core business in support of the Global Shipbuilding, Energy production industries by further diversifying vertically and horizontally to consistently deliver superior products, services and greater value to eventually guarantee being the Partner of choice to all of our customers.

# WHY AL ZAMAN GROUP

AZG is a Multinational Manufacturing , Engineering and Services companies with special focus on Shipbuilding and offshore service. Our Shipbuilding production division aims to support our multinational Energy transporters and Ports operators. With more than 25 years of experience, our Energy division provides turnkey Production and Procurement solutions for the Oil and Gas industries across the Globe; in doing so AZG uses only the best and latest Technologically and Environmentally

advanced processes. We strive to partner with a multitude of companies from Energy, Shipbuilding as well as Project Management in order to give our valued customers an integrated state of the art solution that is diverse and fitting for tomorrow's requirements. In working with you we will dovetail to achieve your needs and requirements in the most effective manner which will make us your partner of choice today, tomorrow and beyond.

# INDUSTRIES WE SERVE

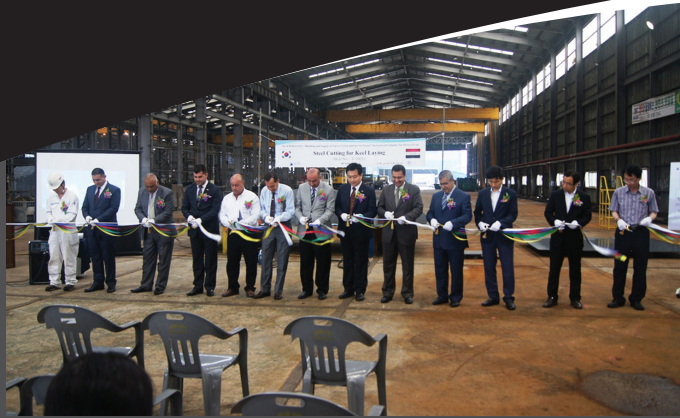

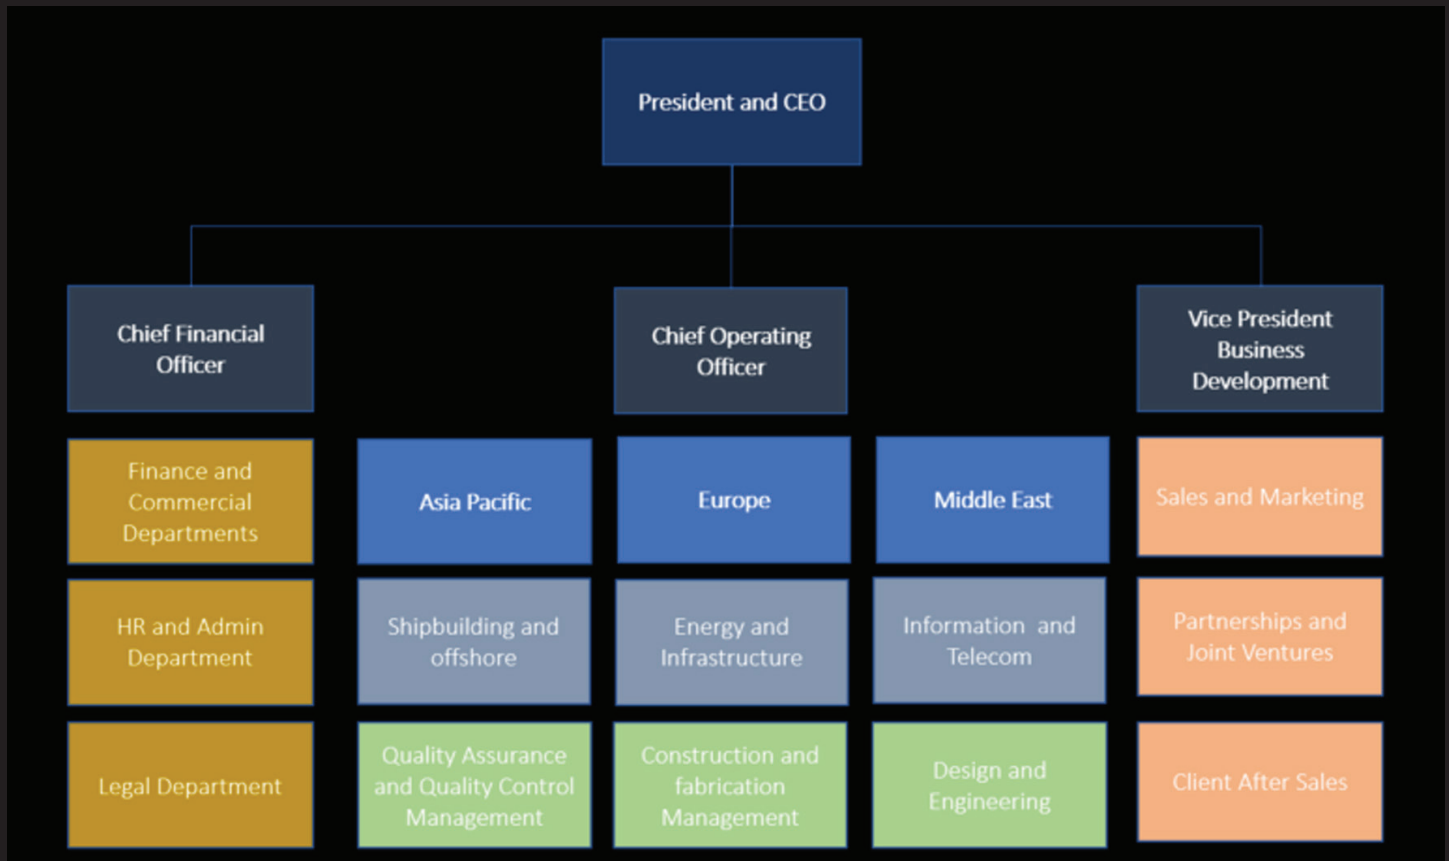

Al Zaman Group is a multiple nationality group of companies spread around the Globe and considered an Iraqi, Jordanian, Turkish and a Korean group of companies with a long experience in different fields of industries that successfully completed major projects in Iraq since 1992.

Al Zaman Group is currently effectively operating in Iraq, United Kingdom, Turkey, South Korea, Malaysia, Jordan and The United Arab Emirates. Our Slogan abbreviates it all; innovation and development implemented with trust and respect secures the execution of each project no matter how challenging it seems.

# INDUSTRIES WE SERVE

## ESTABLISHMENT

It was established in Iraq and has high experience in the fields of: Shipbuilding, Energy production systems of electricity, oil and gas, power plans, Water treatment, railways, general supplies and construction.

## TURNAROUND

Since 1992 we have successfully managed to complete major projects in Iraq leaving our customers with best results

## EXPERT STAFF

Our staff are highly qualified and well experienced in their work. They have over 25 years of experience working in local environment with excellent communication skills in dealing with foreign companies and governments.

## ABOUT US

# SHIPBUILDING FROM DESIGN TO RESOURCES

AL ZAMAN Group companies aims to excel in ship building by carrying out new building and ship repair activities in full compliance with the national and international rules, regulations and standards; by keeping customer satisfaction, environmental and occupational health & safety in the forefront; by being open to innovative ideas in the light of continuous improvement and proactive approach, by reaching total quality, safety and environment excellence, without making any concessions from the professional ethics and principles; by ensuring active participation of all employees in a corporate structure and under the top level professionalism with fair and reliable.

### CONTACT US

management system together with the most competent staff; by pioneering new implementations to stand as a model of shipyard operation and management systems.

by adopting the understanding of Zero Incident – Zero Pollution and 100% Customer Satisfaction as its motto and by combining this philosophy with professionalism.

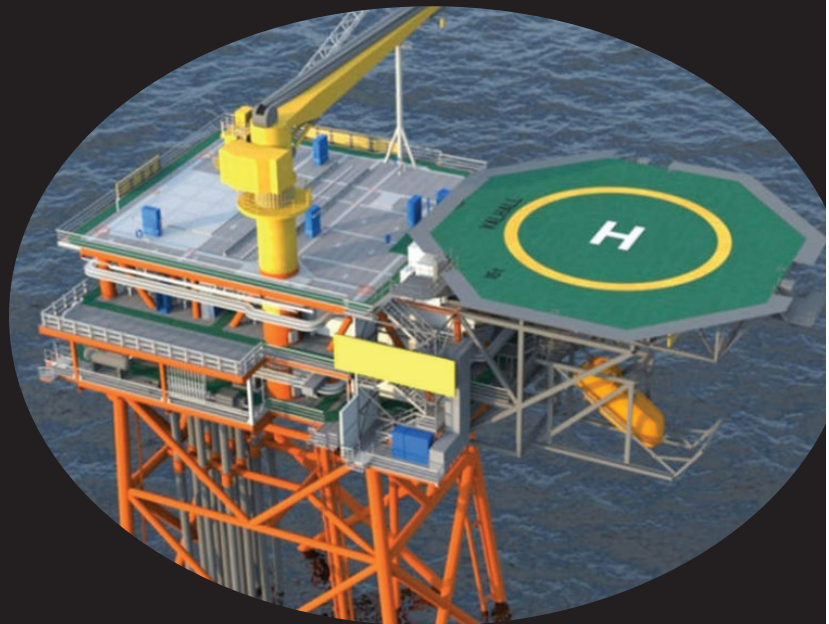

# SPECIAL PURPOSE SHIPS

- Tug boats (Robert Alan or Kenton Design)
- Ocean Research Vessel (Survey vessels)
- Passenger boats
- Fast service boats
- Trailing Suction Hopper Dredger
- Cutter Suction Dredger
- Fire fighting Tugs
- Oil Recovery Vessel

# LIVING QUARTERS

We are the partner of choice for high quality, cost effective modular offshore accommodation solutions. From small 50-man Living Quarters right through to a luxurious 300-man offshore complex and up to 700-man accommodation barge. We operate a construction method which is safe, efficient and uses fewer simultaneous trades during the build process to ensure interface conformity through to installation and hook up. Internal cabin modules are also utilized to reduce the onsite construction schedule during fit-out and services installation.

- Light and cost efficient weight design.
- High specification and levels of completionHorizontal section construction methods.
- Reduced risk of potential safety incidents.
- Ergonomically designed living space.
- State of the art recreation areas.
- Single or double cabin modules with integrated wet rooms.
- Cantilevered helideck option.
- Long design life guarantee.
- Blast and fire rating protection.

**Bulk carriers : 15,000 DWT – 70,000 DWT**

**Jack-up Accommodation Barges**

# Shipbuilding

## NAVY VESSELS

AZG Group companies build navy vessels and military ships including frigate, cruiser, destroyer, fast craft, petrol, and pursuit vessel with specific classification rules based on our experience throughout the shipbuilding industry and built with a deep understanding of three important areas of naval warfare- function, capabilities, and role. We help our clients balance military specifications with safety objectives by reviewing the design and providing a technical evaluation for our client's vessels.

Naval ships differ from merchant ships in design and purpose, they are faster and more maneuverable. Generally, naval ships are damage resistant and armed with weapon systems, although armament on troop carriers is light or non-existent. Building military ships to ever more demanding performance

standards for ever more elaborate scenarios is tougher today than ever before. We have been doing this for years, in that time we have delivered various types of vessels including military vessels and warships. Naval vessel operations often require specialized equipment such as weapons, ammunition, and supplies for its crew, in addition to the unique ship layouts. Stringent safety standards for patrol and combat ships are updated regularly, and navies cannot risk falling behind. Build quality is paramount, and older ships may need to be dismantled to make way for modern models.

Above all, crew safety requires optimized ship design and thorough inspection of ships during the construction phase. We have a particular focus on these areas and tailor our designs and systems integration

accordingly. Our designs can be specialized for both high-threat and low-threat scenarios as well as preventing enemy attack, meeting the navies' need for flexible naval forces. We build naval ships to the highest naval standards to ensure they are always combat-ready, operational, and have a long service life. All in all, quality is of paramount importance to us. This strong principle has set AZG Group companies apart from other competitors, earning the trust of many navies around the world.

### General Specifications

Length up to 180m

Beam up to 25m

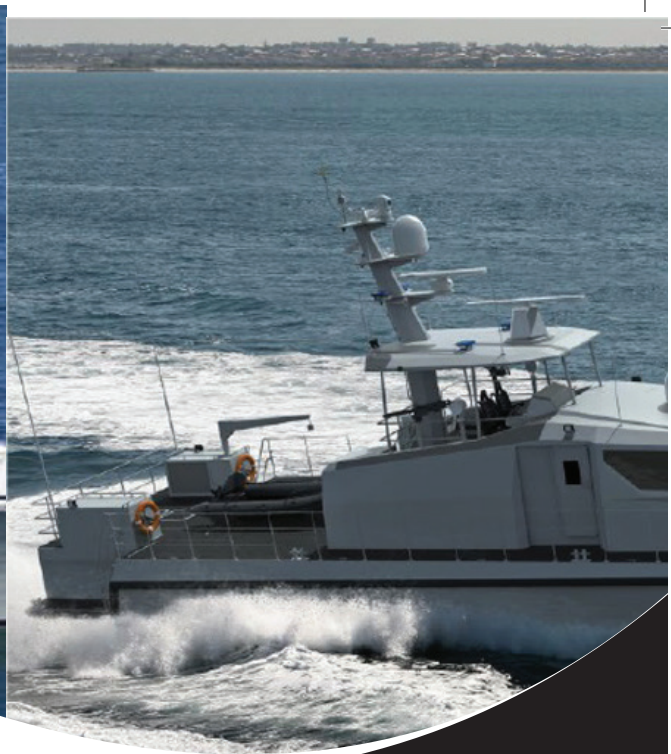

Draught up to 10m

Deadweight up to 2400 MT

Speed up to 35 knots.

Crew up to 200 personnel

## NAVY VESSELS

### 1: ISLAND CLASS CORVETTE (Ada- class corvette)

A modern coastal warship with native anti-submarine warfare and offshore patrol capabilities while making extensive use of stealth technology principles in its design. Subsequent ship planned to be built by one of AZG Group companies would have a more optimized design configuration.

A Ship Integrated Combat Management System is developed on the Ada class corvette as well as ECPINS & IPMS.

#### Principle Particulars:

Length: 99.5m  
Breadth: 14.4m  
Draft: 3.85m  
Speed: 29+ knots  
Displacement: 2400 MT

### 2: SAR Boat (Search and Rescue)

Search and Rescue boats are designed for coast guard's operation in coastal or riverine areas. They are designed to proceed to life-saving operations, coast surveillance, and support security events at sea. The SAR boats are well known for their high speed in rough waves and designed for efficiency and comfort in the working environment which increases the capabilities of rescue and recovery operations. The SAR boat can be built in Aluminum, GRP, or Steel and can be customized to the owner's requirement.

#### Principle Particulars:

Length: 33 m  
Breadth: 7.6m  
Draft: 1.9m  
Max Speed: 30 knots (@100% MCR)  
Propulsion: 2 x Water Jet (2 x 2400 HP)

# Shipbuilding

## NAVY VESSELS

### 3: Patrol Boat

A boat designed for coastal defense, border protection, immigration law enforcement. Their

main duties include anti-smuggling, anti-piracy, fisheries patrols, and also often called upon to participate in rescue operations. Patrol boats are warships typically smaller in size and can include fast attack craft, torpedo boats, and missile boats. The boat hull is built in Aluminum to achieve high speeds through their diesel-powered waterjet propulsion system.

Principle Particulars:

Length: 15.68 m

Breadth: 4.6 m

Draft: 1.4m

Max Speed: 32+ knots

Complement: 6 crew + 12 pax

Propulsion: 2 x Water Jet (2 x 1182 HP)

Weaponry: 30mm MSI-DS30M A2 Seahawk gun

2 x Automatic rifle caliber 12.7mm

### 4: Coastguard vessel (704)

Coastal defense vessels are multi-role minor war vessels with a primary mission of coastal surveillance and patrol including general naval operations and exercises, search and rescue, law enforcement, resource protection, and fisheries patrols. These ships are very flexible, which allows for a rapid role change from one mission type to another. They are crewed primarily by Naval Reservists and are divided equally between the coasts.

Principle Particulars:

Length: 86 m

Breadth: 12.2 m

Draft: 3.6 m

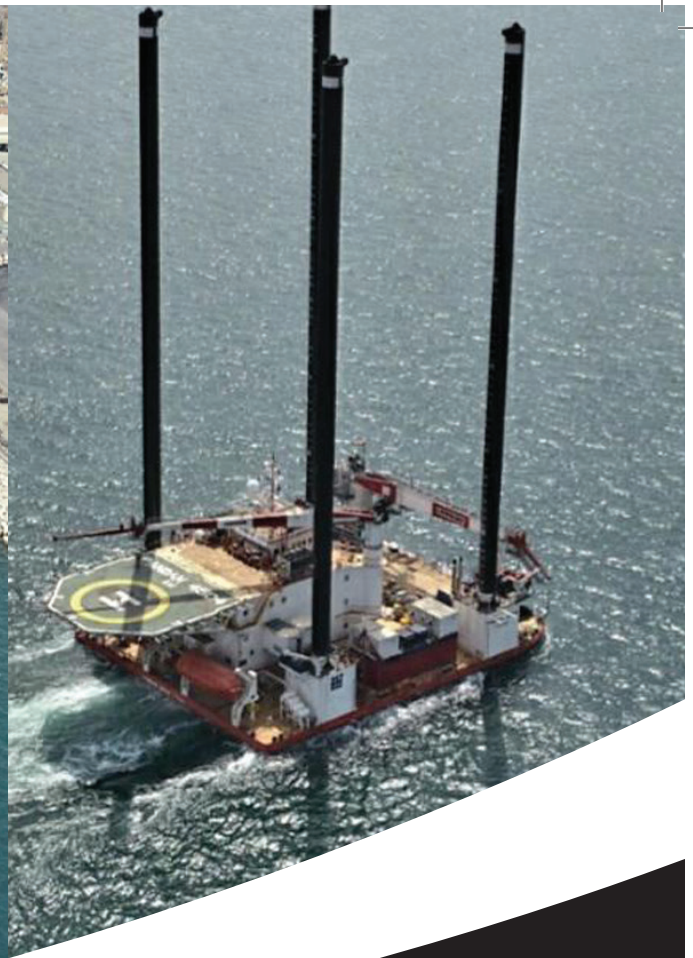

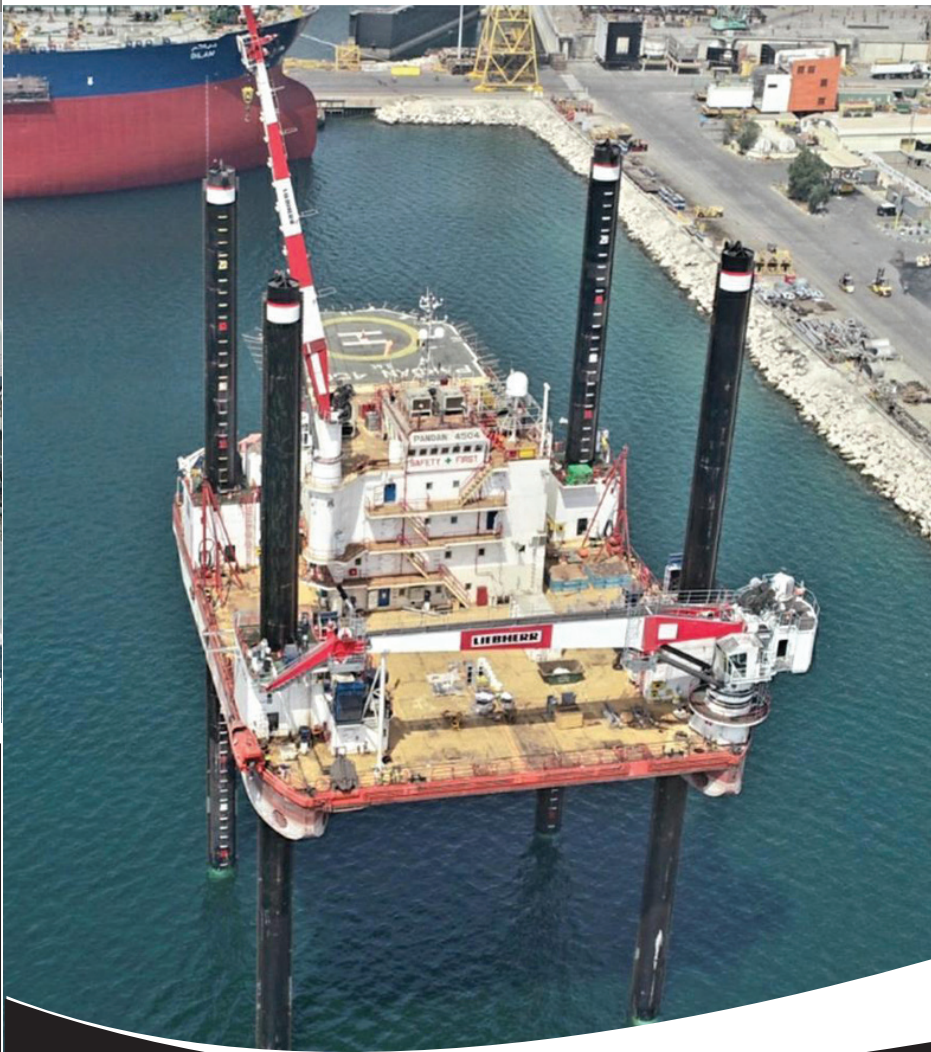

Displacement: 1700 tons

Weaponry:

Ball: 40mm, 40170 Auto Melara

Machine Gun: 2 x 12.7mm

# Shipbuilding

**Tankers: Oil, Product and Chemical tanker from 10,000 DWT up to 75,000 DWT**

**Container Carriers: 1,000 TEU – 5,000 TEU**

**Anti pollution boat**

# Shipbuilding

**Oil spill recovery barge**

**TUG BOATS**

**FLOATING DOCK**

A floating dock with a lifting capacity up to 10,000 tons capable of lifting ships up to 200m long.

# SHIPYARD FACILITIES

Al Zaman's Shipyards have been in constant growth over the past 15 years. We have further expanded our production capacity in recent years through our sister companies. Al Zaman has various production sites primarily in:

- South Korea located in Gwangyang and Busan.
- Turkey (Denizcilik) located in Tuzla Istanbul Teressana.
- UK located in North West of England.

## MARINE PRODUCTS AND SERVICES

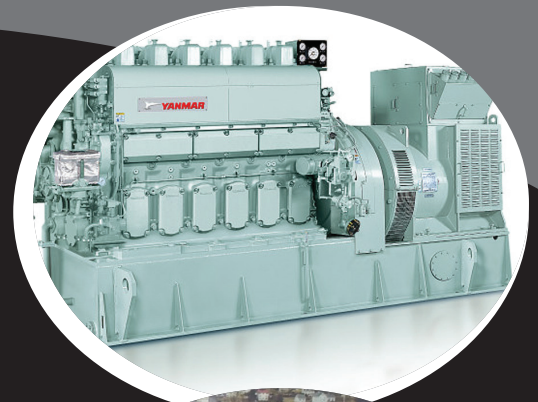

# WE SPECIALIZE IN ALL ASPECTS OF YOUR MARINE LIFE INCLUDING ENGINES, GENERATORS, PROPULSION SYSTEMS AND MAINTENANCE, COMPONENTS, PARTS AND ACCESSORIES YOUR VESSELS NEED

Product knowledge, hands-on experience, regional familiarity and outstanding customer service skills are what have driven our selection criteria for AZG Marine team. Our team intends to treat clients as they'd like to be treated – we stand ready to bring peace of mind and a refreshingly simple approach to the commercial marine industry. Like any item with moving parts, marine products and accessories need regular servicing and occasional repairs. AZG's skilled and fully trained service team special in Yanmar Marine is able to cater for all your service needs.

# TELECOMMUNICATION AND IT

## TELECOMMUNICATION AND IT QUALITY AND TESTING TOOLS

In partnership with world class technology manufacturer like KEYSIGHT, ANRITSU and AH Systems to complete full line of testing and quality tools.

Al-Zaman group as part of its commitment to enable CMC to achieve its mission in controlling the quality of the radio and wireless services provided in Iraq, AZG supplied test and quality tools from premium world class manufacturers Keysight, Anritsu and AH Systems.

## **ERP & ENTERPRISE IT SOLUTIONS**

- ERP Implementation.
- Resource Provisioning & Employment placement.
- Management consultancy.
- Training & Support.

## **AL ZAMAN GROUP HAS DEVELOPED ITS LOCAL TEAM AND BUILD ITS GOLDEN PARTNERSHIP WITH ORACLE**

to be the best innovative IT service partner for businesses and provides Automation of Business Processes.

Provide consistent, effective and cost effective IT services & solutions by introducing new innovative solutions to different governmental organizations and operations. It enables to interconnect different organization departments and blocks to vast dimension of HR, inventory and finance modules. This

empower future launching of e-Government to interlink government services, Tax and customs.

The Company Focus on:-

- ERP Implementation.
- Resource Provisioning & Employment placement.
- Management consultancy.
- Training & Support.

### **ERP SOLUTIONS**

## **TRAINING AND QUALIFICATIONS**

Al-Zaman group builds strategic partnership with both world class manufacturers and potential customers in Iraq through bridging the gaps and providing different level of training helping accumulate Iraqi's skills and knowledge. The partnership is extended to provide level 2 and 3 support from the manufacturers.

# OIL & GAS

## AZG OFFER A FULL RANGE OF ENGINEERING, PROCUREMENT, FABRICATION AND CONSTRUCTION MANAGEMENT SERVICES

### OUR PRODUCTS

#### IN-HOUSE EXPERTISE

Whether it be enhancing oil recovery from existing fields or providing innovative solutions to develop new fields, the collective experience within our delivery teams is accustomed to embracing the toughest challenges to deliver fit-for-purpose solutions, often in harsh environments with temperature extremes of heat and cold. This, combined with uncertain market conditions presents a number of issues, constraints and risks.

We are solution driven with a wealth of expertise to overcome such technical and commercial challenges to help our clients

deliver results, safely.

Our specialist engineering group often allow us to create even more value and competitive advantage with available in-house expertise for:

- Geotechnical,
- Environmental,
- Seismic,
- Hydrology,
- Water,
- Marine and Coastal scope.

A photograph of a large industrial oil and gas processing facility. The image shows several tall, cylindrical metal vessels, likely distillation columns or separators, connected by a complex network of pipes and metal walkways with railings. The scene is brightly lit, possibly by natural light, highlighting the metallic surfaces and the intricate structure of the plant.

# OIL & GAS PRODUCTS AND SERVICES FOR

1. Completion products
2. Intervention services and tools

## OUR PRODUCT RANGE

Well Construction & Integrity: CAPEX effective, life of well integrity. Well Completions: extended reservoir contact, increased recovery

# WELL COMPLETIONS

### 1. Well abandonment

Enhance well construction for CAPEX effective Plug and Abandonment through incorporation of WAB® (Welltec® Annular Barrier).

### 2. Zonal isolation

Segmented Flex-Well® design increases options to mitigate reservoir uncertainty and maximizes the economic value of wells.

### 3. Zonal control

Welltec® Flow Valves (WFV) enable changing reservoir conditions over the life of well to maintain maximum well delivery.

### 4. Geothermal applications

Geothermal energy offers the highest capacity factor in the renewable market and requires consistently high temperature fluid flows to ensure a reliable output.

# **ELECTRICTY AZG IS AN ENGINEERING COMPANY WITH PROFESSIONAL EXPERIENCE IN ELECTRIC POWER INFRASTRUCTURE**

## التقنية الحديثة

### تدشين أربع سفن جديدة ضمن الخطة الوطنية لمكافحة الانسكابات النفطية

بغداد - تم تدشين أربع سفن جديدة ضمن الخطة الوطنية لمكافحة الانسكابات النفطية، وذلك في إطار تنفيذ برنامج تطوير البنية التحتية للموانئ العراقية. السفن الجديدة هي سفن مكافحة التلوث، وستعمل على تعزيز قدرة العراق في مواجهة التحديات البيئية الناتجة عن حوادث التسرب النفطي.

تم تدشين السفن الجديدة في ميناء البصرة، بحضور مسؤولين من وزارة النفط والموانئ العراقية، بالإضافة إلى ممثلين من القطاع الخاص. السفن الجديدة هي سفن مكافحة التلوث، وستعمل على تعزيز قدرة العراق في مواجهة التحديات البيئية الناتجة عن حوادث التسرب النفطي.

## Preparing 4 ship to fight oil spillage according to national plan

The Iraqi government is preparing four new oil spill response vessels as part of a national plan to enhance its maritime pollution control capabilities. The vessels, which are being built in Iraq, will be used to monitor and respond to oil spills in the country's waters. The plan also includes training for crew members and the implementation of strict regulations to prevent oil spills in the first place.

## Iraq prepares to enter the Malabour Agreement to fight oil spillage

Iraq is preparing to enter into the Malabour Agreement, a regional pact aimed at reducing oil pollution in the Persian Gulf. The agreement, which is being signed by several Gulf states, will establish a framework for cooperation in monitoring and responding to oil spills. Iraq's participation in the agreement is seen as a significant step towards improving its environmental protection and maritime security.

## 35 Iraqi port engineers training

A group of 35 Iraqi port engineers are undergoing training in Malaysia. The training is part of a technical assistance program organized by the Ministry of Transport and Highways. The engineers will receive specialized instruction in port operations, maintenance, and safety. The program is expected to improve the efficiency and safety of Iraq's port infrastructure.

The training is being held in Malaysia, where the engineers are learning from experienced professionals in the field. The program includes both theoretical and practical components, ensuring that the engineers are well-prepared to handle the challenges of port management in Iraq.

## العراق يستعد لدخول اتفاقية المانور الدولية لمكافحة التلوث البحري

يستعد العراق لدخول اتفاقية المانور الدولية لمكافحة التلوث البحري، وذلك في إطار تنفيذ برنامج تطوير البنية التحتية للموانئ العراقية. الاتفاقية تهدف إلى تعزيز التعاون بين دول الخليج في مراقبة والاستجابة لحوادث التلوث النفطي في المياه الإقليمية.

تم توقيع الاتفاقية في مدينة مالابور، وهي خطوة مهمة في تعزيز قدرة العراق على مواجهة التحديات البيئية الناتجة عن حوادث التسرب النفطي. الاتفاقية ستعمل على تحسين التنسيق بين الدول الموقعة، مما يسهل عملية الاستجابة السريعة في حالة وقوع حوادث التلوث النفطي.
